BunkCalc

Smart Attendance Tracker for Indian College Students

Version 1.0 · May 2026 · Fayez

1. Product Overview

BunkCalc is a mobile-first attendance management app built specifically for Indian college students. The core product insight: students don't want to *track* attendance — they want to know **how many classes they can skip without falling below the 75% threshold**. Every feature is built around answering that one question, fast.

Problem Statement

Pain Point	Current Workaround	Cost
Don't know safe bunk count per subject	Mental math or Excel	Wrong calculation → detention
No warning before hitting danger zone	None	Surprise shortage at semester end
Tedious to mark attendance daily	Don't bother tracking	Lost visibility entirely
Can't plan ahead for trips/events	Guess and hope	Missing important events or risking attendance

Target User

Primary: Engineering/B.Tech students at Indian colleges with mandatory 75% attendance requirement. Age 18–22. Android-first. Pilot: KIIT University, Bhubaneswar.

Secondary: Students at any Indian college with fixed attendance thresholds.

2. Goals & Success Metrics

Goal	Metric	Target (3 months)
Adoption at KIIT	Installs from KIIT campus	500+
Daily active use	DAU / MAU ratio	>40%
Organic growth	Installs via share feature	>30% of total
Retention	Day-7 retention	>50%
App store rating	Play Store rating	>4.2

3. Feature Specifications

F1 — Bunk Budget (P0)

- Per-subject display of: current attendance %, classes attended / total, safe bunks remaining

- Threshold configurable (default 75%, supports 80% for buffer)
- Colour coding: green >85%, amber 75–85%, red <75%
- Updates instantly on attendance mark

F2 — One-Tap Daily Marking (P0)

- Today's timetable auto-populated from saved schedule
- Present / Absent / Cancelled in single tap per subject
- Undo within 60 seconds of marking
- No login required — fully local

F3 — Danger Zone Alerts (P0)

- Push notification when any subject crosses 80% (configurable warning threshold)
- Weekly Sunday summary: subjects at risk
- In-app banner on home screen for at-risk subjects

F4 — Semester Timeline (P1)

- Total remaining classes in semester
- Projected end-of-semester % at current skip rate
- 'If I attend everything from now' projection
- Semester end date configurable

F5 — Shareable Attendance Card (P1)

- One-tap generate share image: subject-wise bunk budget, overall %, a risk/safe badge
- Export as PNG for WhatsApp/Instagram stories
- BunkCalc watermark for organic growth

F6 — Timetable Setup (P0)

- On-boarding wizard: add subjects, assign days + time slots
- Edit anytime from settings
- Support for lab sessions (counts as 2 classes)

4. Core User Flows

First Launch

1. App opens → Welcome screen → 'Set up your timetable'
2. Add subjects one by one (name, credits, days, time)
3. Set semester end date + attendance threshold

4. Home screen shows all subjects with 100% attendance (0 classes recorded)
5. Optional: enable push notifications

Daily Use (30-second flow)

1. Open app → Today's classes listed automatically
2. Tap Present / Absent / Cancelled for each
3. Bunk budget updates in real-time
4. Close app

Share Flow

1. Tap Share icon on home screen
2. Preview attendance card generated
3. Tap share → opens native share sheet
4. Send to WhatsApp group / Instagram story

5. Out of Scope (V1)

- ✗ College ERP / portal sync
- ✗ Social features (comparing with friends)
- ✗ Cloud backup or login
- ✗ iOS version
- ✗ Timetable import via photo/PDF

6. Launch Plan

Phase	Action	Timeline
Build	Core features F1–F4 + F6	Week 1–2
Beta	Share APK in KIIT WhatsApp groups	Week 3
Viral	Ship share card (F5), collect feedback	Week 4
Expand	Post in other college groups, Play Store submission	Week 5–6
